

## ICT Solutions

Our years of experience in Project Management and Business Development on the European markets have shown us the importance of every small detail for the success of a project. Our IT experts and project management team will guide you from the initial step of a business idea to implementation of a cost effective software solution. We will deliver a valuable business tool specially designed to serve the specific needs of your business.

Our active presence in Europe (offices in CH, CZ and RO) is a main advantage for our customers. We are able to work close together to your project team, our IT engineers would travel to your company's headquarter, implement and finalize the project on the spot. This is the best way to optimize the coordination time and resources through a direct information flow.

We offer a large variety of solutions for the ICT systems of your company:

- Webpage and Web Application Development
- Application Development
- Information Security Solutions
- Server and Network Solutions
- IT Consultancy and Analysis

We are able to work close together to your project team and finalize the project on the spot with our IT engineers working directly from your company's headquarter. This is the best way to optimize time and resources through a direct information flow.

### Webpage and Web Application Development

We can take over web presentations and applications or create new ones fitted to your needs. We have experience with Joomla, Drupal, Wordpress redaction and more CMS-systems. The programming languages used are: PHP (PHP5) and Java script with MySQL or MSSQL databases.

### Application Development

We can provide everything from simple one-purpose applications to complex multiplatform client server solutions. We can implement new functions into existing systems or make whole new systems fitted exactly to your needs. Following programming languages and IDEs are used: Visual C#, MS Visual studio, C+/C++, MSSQL, MySQL. Moreover, we offer user training for the applications we develop and we can explain and teach your employees how to operate it.

### Salesforce Development

Our specific expertise includes custom development using the Force.com platform as well as customizations to the existing suite of products. From the fully functional CRM base product that may only need minor customization to make it work for your business, to systems that need extensive, under-the-hood programming to deliver results.

SwissCEE (Swiss Central Eastern Europe) supports companies and organisations in establishing business relations with the economically aspiring countries in Central and Eastern Europe. SwissCEE develops comprehensive and customized Language Solutions, ICT Solutions, Business Development and Subsidies A-Z.

SwissCEE is financially, economically and politically independent. Narrow structures and use of the latest technology guarantee flexibility and efficiency.

SwissCEE offers a dense partner network in business, politics and administration, running offices in Switzerland, Central Europe (CZ - Prague) and Eastern Europe (RO - Bucharest). Our strong presence in the target countries is, in addition to our long years of experience, one of the vital factors for success in business: It's not theory and great concepts which lead to business success, but rather active presence in the economic area: this is our conviction!

The information contained herein is of a general nature and is not intended to address the circumstances of any particular individual or entity. SwissCEE and the SwissCEE logo are registered trademarks of SwissCEE, a Swiss company.
